Preliminaries for Data Analysis

Instructions:
Please share your answers filled in-line in the word document. Submit code separately wherever applicable.

Please ensure you update all the details:
Name:SUBHAM SAHU Batch ID:24/07/21 Topic: Preliminaries for Data Analysis

Grading Guidelines:
1. An assignment submission is considered complete only when correct and executable code(s) are submitted along with the documentation explaining the method and results. Failing to submit either of those will be considered an invalid submission and will not be considered for evaluation.
2. Assignments submitted after the deadline will affect your grades.

Grading:

Ans	Date			Ans	Date
Correct	On time	A	100		
80% & above	On time	B	85	Correct	Late
50% & above	On time	C	75	80% & above	Late
50% & below	On time	D	65	50% & above	Late
		E	55	50% & below	
Copied/No Submission		F	45		

- **Grade A: (>= 90):** When all assignments are submitted on or before the given deadline.
- **Grade B: (>= 80 and < 90):**
  - When assignments are submitted on time but less than 80% of problems are completed.
    (OR)
  - All assignments are submitted after the deadline.
- **Grade C: (>= 70 and < 80):**
  - When assignments are submitted on time but less than 50% of the problems are completed.
    (OR)
  - Less than 80% of problems in the assignments are submitted after the deadline.
- **Grade D: (>= 60 and < 70):**
  - Assignments submitted after the deadline and with 50% or less problems.

- **Grade E: (>= 50 and < 60):**
  - Less than 30% of problems in the assignments are submitted after the deadline.

    (OR)
  - Less than 30% of problems in the assignments are submitted before the deadline.

- **Grade F: (< 50):** No submission (or) malpractice.

Problem Statements:

1. Identify the data type (continuous/discrete) for the following:

Activity	Data Type
Number of beatings from Wife	DiSCRETE
Results of rolling a dice	Discrete
Weight of a person	CONTINUOUS
Weight of Gold	CONTINUOUS
Distance between two places	CONTINUOUS
Length of a leaf	CONTINUOUS
Dog's weight	CONTINUOUS
Blue Color	Discrete
Number of kids	Discrete
Number of tickets in Indian railways	Discrete
Number of times married	Discrete
Gender (Male or Female)	Discrete
Voltage	CONTINUOUS
Speed of the car	CONTINUOUS
Distance between planets	CONTINUOUS
The size of a two a bedroom flat	CONTINUOUS
Wind speed	CONTINUOUS
Facebook likes	Discrete
Votes in election	Discrete

© 2013 - 2021 360DigiTMG. All Rights Reserved.

Make up kits purchased	Discrete
Death toll in flood disaster	Discrete
The waiting time of customers in bank	Time is (conti)&customer is discrete
Price of iPhone in the market	Discrete
Stolen Cars	DiSCRETE

2. Identify the data types (Nominal, Ordinal, Interval, and Ratio)

Data	Data Type
Gender	Nominal
High School Class Ranking	Ordinal
Celsius Temperature	Interval
Weight	Ratio
Hair Color	Nominal
Socioeconomic Status	Ordinal
Fahrenheit Temperature	Interval
Height	Ratio
Type of living accommodation	Ordinal
Level of Agreement	Ordinal
IQ (Intelligence Scale)	Interval
Sales Figures	Ratio
Blood Group	Nominal
Time of Day	Interval
Time on a Clock with Hands	Interval
Number of Children	Ratio

© 2013 - 2021 360DigiTMG. All Rights Reserved.

Religious Preference	Nominal
Barometer Pressure	Interval
SAT Scores	Interval
Years of Education	Ratio
Size of egg	Ordinal
Monthly Income	Ratio
Unemployment rate	Ratio
Military Rank	Ordinal
Shoe size	Ordinal
Pulse rate	Interval
Vital capacity	Interval
Favorite candy bar	Nominal
Name of the Grains	nominal
Pesticides level	Ordinal
Tribe of origin	nominal
Help Desk Service Satisfaction Score	Ordinal
Ethnicity	nominal
Marital status	Nominal
Type of Residence	Ordinal
Swimming level	Ordinal
Amount of Money	Ratio
Colors of paint	Nominal
Weekly Food spending	Ordinal

3. Identify whether the data is qualitative or quantitative:

Data	Data Type (Qualitative/Quantitative)
I bought Strawberry lipstick today	Qualitative
Happiness rating	Qualitative
Duration of red-light signal	Quantity
I like butterscotch ice cream	Qualitative
Setosa belongs to Iris family of flowers	Qualitative
cold Coffee	Qualitative
The Tea smells good	Qualitative
Dress Size	Quantitative

4. Identify whether the data is categorical or numerical for the following:

Data	Data Type (Categorical / Numerical)
Product type	Categorical
Native language	Categorical
Type of teaching approach	Categorical
Virus in a System	Categorical
Covid-19 Positive Cases	Numerical
Lockdown Days	Numerical

© 2013 - 2021 360DigiTMG. All Rights Reserved.

5. Identify whether the data is structured or unstructured for the following:

Data	Data Type (Structured/Unstructured)
Credit card numbers	Structured
Transaction information	Structured
Text files	Unstructured
Images	Unstructured
Music files	Unstructured
Credit card numbers	Structured
